

PVA 4310 Video conferencing speaker

Good sound quality is critical if you want to have a productive video conference. However, it isn't easy to find. Most video conferencing systems focus on video, with a good or even excellent display and camera. But their loudspeakers are often nothing more than a small table unit with low audio quality. Vogel's developed a unique range of loudspeakers, especially designed for video conferencing. Our speakers give you a truly high-quality voice audio experience to match the video quality.
