INSTALL THE MODULE

Installation instructions are in a separate document, which you can find on support.ctouch.eu:
[Installation/ User Manual - CTOUCH Support](#)

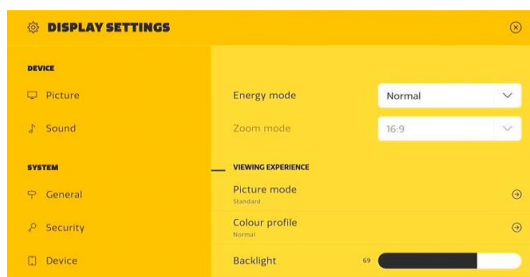

SETTINGS

You will find that settings are organized somewhat different than you are used to in displays without the upgrade module.

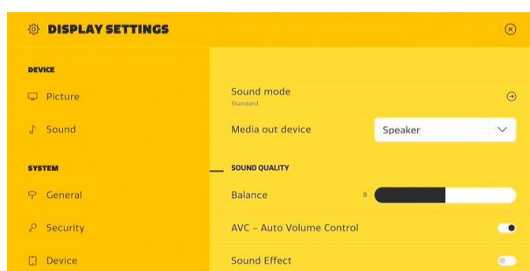

With the Android Upgrade Module, settings are found in 2 places

DISPLAY SETTINGS

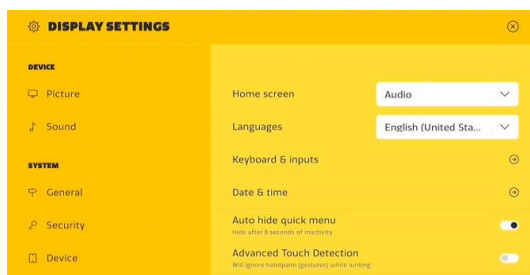

Display settings are accessible by pressing the CTOUCH button on your display. Settings like volume, energy mode and other display settings are found here

Display settings

Sound settings

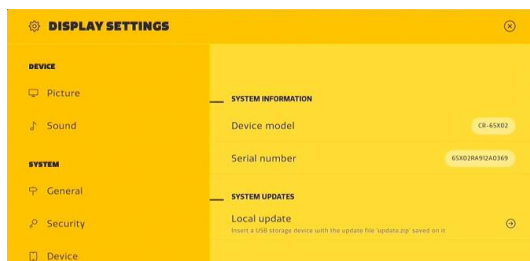

General settings

Display security settings.

Note: this page is only accessible after entering admin pin.

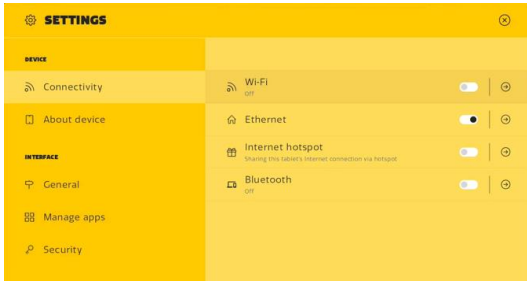

About device.

Here you can also – only with USB update your display firmware. Typically, you will not be using this option.

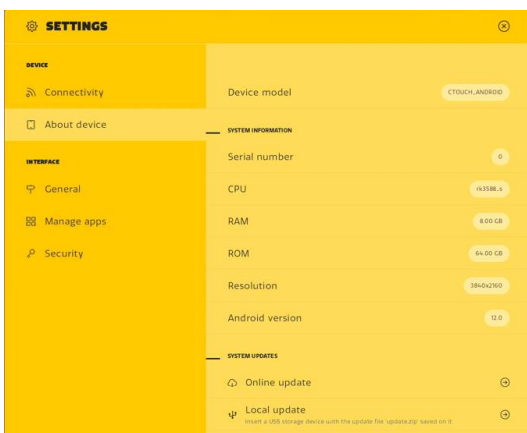

ANDROID SETTINGS

These are accessible by selecting the android settings app. You can find this app by selecting "All apps first."

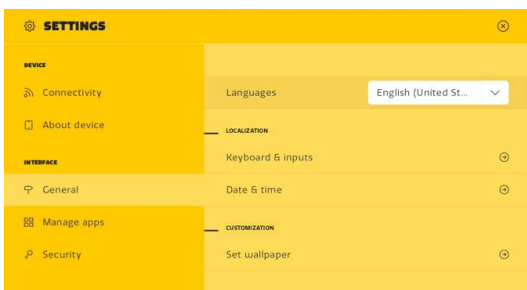

Here you find settings related to apps, firmware updates, connectivity and android security. This is also the place to change your wallpaper.

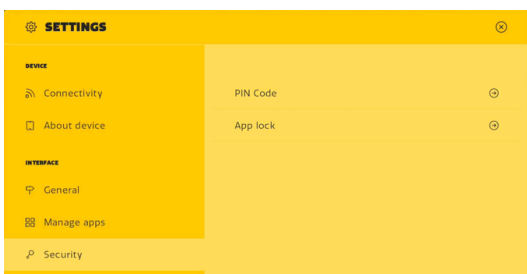

Setup your network

Information on your device and firmware update options. Typically, this is the place to update your firmware.

Time, language settings and wallpaper

Android security settings

CONFIGURATION

SETUP SPHERE REMOTE MANAGEMENT TOOL

Sphere device management activation is handled from the wizard and use are explained in the Sphere user manual, which you can find on <https://support.ctouch.eu>: [User Manual Sphere – CTOUCH Support](#)

SETUP WIRELESS SHARING WITH ESHARE

- Eshare license is pre-activated
- You can find more information about configuring and using eshare on <https://support.ctouch.eu>: [EShare Manual – CTOUCH Support](#)

LOCK APPS

- Start Android settings app
- Go to Security
- App lock / {application}

After using this setting, the administrator pin is required to use the locked app.

Note:

If you want to use application lock, your admin account needs to be secured with pin.

ACTIVATE WAKE ON LAN

This setting can be activated in the Android dealer menu. Ask your dealer for assistance.

Note

Your network must support Wake On Lan.

At least one CTOUCH touchscreen must be active (online) and visible in Sphere to turn on other CTOUCH touchscreens.
