

# ISP Core 16

## IMMERSIVE AV PREAMP PROCESSORS

- Dolby Atmos, Auro-3D, DTS:X Pro, IMAX Enhanced
- 16ch decoding / upmixing  
Up to 9.1.6 / 11.1.4
- StormXT ambiance expander (optional)
- 16 channels post-processing  
Multi-way active speakers and PEQ management
- Bass Management  
Standard or Expert with up to 6 bass zones (optional)
- Dirac Live Room Correction with Bass Control module
- Room ready streaming
- 16 channels XLR outputs  
Multiple theaters and zones management
- 2ch optical output
- Upgradeable HDMI  
7 inputs / 2 outputs  
Matrix (optional)  
HDMI 2.0/HDCP2.2 with OSD  
4K UHD with HDR10, HLG & Dolby Vision
- Multiple control capabilities  
IR remote control included
- Intuitive web-based configuration
- Remote monitoring and management

# ISP Core 16

## 4K UHD, 16CH, IMMERSIVE AV PREAMPS

The ISP Core 16, designed and manufactured in France, supports up to 16 channels and has all the DSP power to decode all the latest immersive formats (Auro-3D, Dolby Atmos, DTS:X Pro, IMAX Enhanced) and enable post-processing to optimize any speaker to any room straight out of the box. It includes the highest implementation on the market of Dirac Live with Bass Control for easy and accurate room calibration, supports up to 20 PEQs per channel and can drive up to four-way active crossovers and any number of subwoofers.

A refined minimalist design highlighting a new full-color 5" display that provides access to a wealth of information such as real-time multichannel VuMeter or HDMI signal details for quick accessible overview of essential data. The ISP Core 16 can be easily controlled by a variety of tools, ranging from the included IR remote control to home automation systems or the Android/iOS app available on smartphones or tablets. Our credo is to engineer high-performing products that are simple to use and easy to set up for the customer; the ISP Core 16 is no exception, it comes with StormAudio's intuitive User Interface and user-friendly Speaker Configurator.

Based on the design of its big brother the ISP Elite MK3, it delivers the same audio performance with the same DAC portion and proprietary analog/digital hybrid volume adjustment that maximizes the dynamic range for a more accurate, detailed and dynamic reproduction of your movie soundtrack or your music playlists. Although the ISP Core 16 does not offer modularity, upgradability of the HDMI board remains possible so you can stay up to date whenever new updates are released. It currently supports HDMI2.0/HDCP2.2 up to 4K UHD with HDR10, HLG and Dolby Vision as well as ARC/eARC.

An optional firmware package is available to activate additional features: StormXT ambiance expander, Expert Bass Management flexible bass routing and HDMI matrix features (available early 2022).
