

AverVision M90UHD

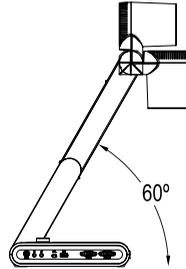

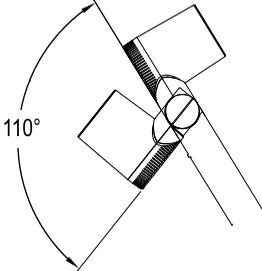

— User Manual —

WARNING

- To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture. Warranty will be void if any unauthorized modifications are done to the product.
- Do not drop the camera or subject it to physical shock.
- Use the correct power supply voltage to avoid the damaging camera.
- Do not place the camera where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- Hold the bottom of the camera with both hands to move the camera. Do not grab the lens or flexible arm to move the camera.
- Do not pull the mechanical arm and camera part in the opposite direction.

- Do not move the camera head over 110° to avoid camera head wear.
- Do not pull the mechanical arm lower than 60° to avoid camera wear.

The mark of crossed-out wheeled bin indicates that this product must not be disposed of with your other household waste. Instead, you need to dispose of the waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. For more information about where to drop off your waste equipment for recycling, please contact your household waste disposal service or the shop where you purchased the product.

Federal Communications Commission

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radiofrequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Power Cord*

Remote Control**

AAA Battery (x2)

USB Cable

VGA Cable

Warranty Card

Quick Start Guide

*The power cord will vary depending on the standard power outlet of the country where it is sold.

**Your device may come with one of the two remote controls.

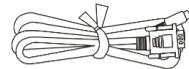

Optional Accessories

Carrying Bag

Anti-glare Sheet

RS-232 Cable

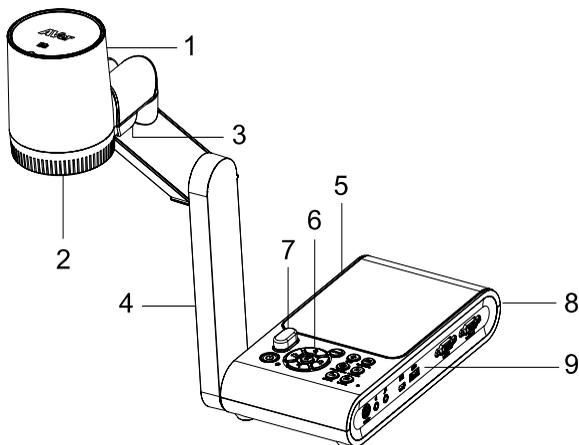

Connecting Plate

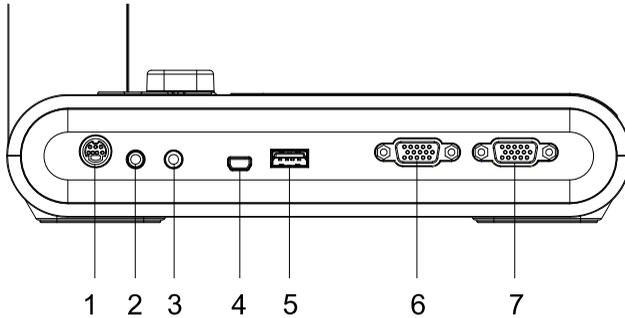

Microscope Adapter
(28mm and 34mm Rubber Coupler are included)

Parts Info

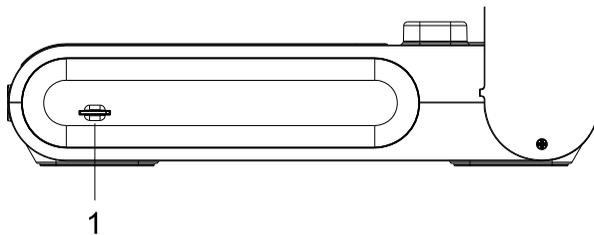

Name	Function
1. Camera head	Contain the camera sensor.
2. Camera lens	Focus the image in the camera.
3. LED light	Provide light to enhance the lighting condition.
4. Mechanical arm	Provide adjustable viewing coverage.
5. Left panel	Micro SD card slot.
6. Control panel	Easy access to various functions.
7. Rear panel	Connections for power, HDMI output/input external display device, and Kensington security lock compatible slot.
8. Right panel	Connections for computer, VGA input/output external display device, and USB Port, Mini USB, MIC in, Line out and RS232 (Optional).
9. IR sensor	Receive remote control commands.

- **Right Panel**

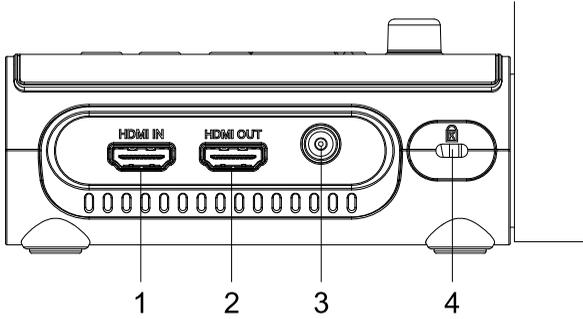

Name	Function
1. RS232 port	Connect this port to a computer by using RS232 cable. For more details, see <RS232 Diagram Connection> . (Optional)
2. Line Out port	Connect to an amplified speaker to playback recorded audio & video clip.
3. MIC in port	Connect to an external microphone.
4. USB mini port	Connect to a USB port of a computer with a USB cable and use AVerVision M90UHD as a USB camera or transfer the captured images/videos from the memory source to the computer.
5. USB port	Insert a USB flash drive to save the images/video directly from the USB flash drive.
6. VGA IN port	Input the signal from a computer or other sources and pass it through to the VGA OUT port only. Connect this port to the VGA output port of a computer.
7. VGA OUT port	Connect the AVerVision M90UHD to any display device with VGA cable.

- **Left Panel**

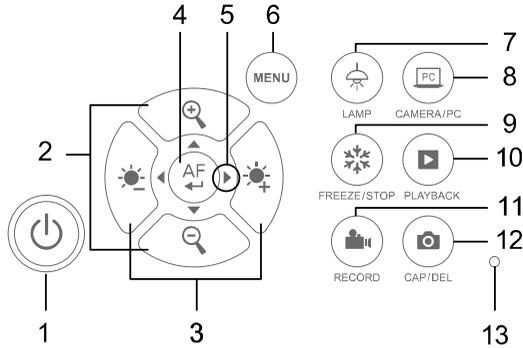

Name	Function
1. Micro SD card slot	Insert the Micro SD card with the label facing up. Micro SD card can save capture image and record video file.

- **Rear Panel**

Name	Function
1. HDMI IN port	Connect an external HDMI source as an input via this port. Connect this port to the HDMI output port of a computer.
2. HDMI OUT port	Output the video signal from the main system on an interactive flat panel, an LCD monitor or LCD/DLP projector with HDMI interface using HDMI cable.
3. DC 5V	Connect the power adapter into this port.
4. Kensington Lock	Attach a Kensington compatible security lock or anti-theft device.

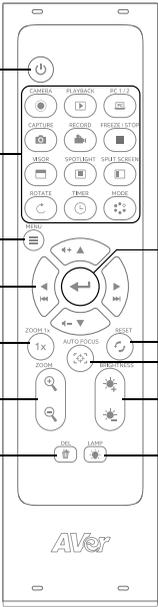

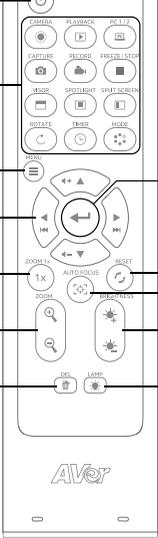

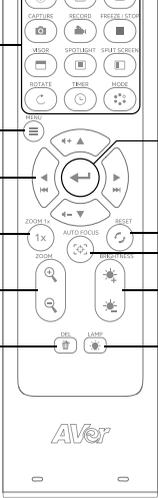

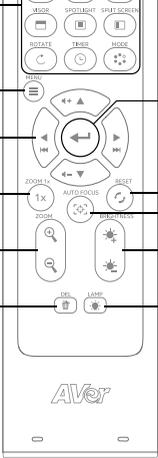

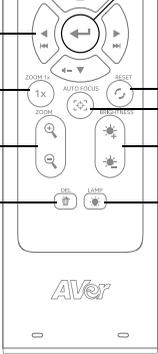

Control Panel

Name	Function
1. POWER	Turn on your device or enter standby mode.
2.	Adjust the brightness.
3.	Zoom in or out.
4.	<ul style="list-style-type: none"> Confirm a selection in Playback mode and OSD menu. Start/Pause video playback. Adjust the focus automatically.
5.	<ul style="list-style-type: none"> Pan and tilt control for digital zoom. Navigate the menu. Adjust volume. Fast forward or rewind the video.
6. MENU	Enter and exit the OSD menu and submenu.
7. LAMP	Turn the lamp on or off.
8. CAMERA / PC	Switch between the camera live view and the external VGA/HDMI source.
9. FREEZE/STOP	<ul style="list-style-type: none"> Pause or resume image display in Camera mode. Stop audio & video playback in Playback mode.
10. PLAYBACK	View & playback captured images and video files.
11. RECORDING	Start and stop the audio & video recording. You can only save your recordings on an SD card or a USB Flash drive. For more information, please refer to <External Memory Storage.>
12. CAP/DEL	<ul style="list-style-type: none"> Press once to take a snapshot in Camera mode, and press again to stop in continuous capture mode. Delete the selected picture/video in Playback mode.
13. Built-in MIC	Record audio when recording a video clip. The recorded sound will be in monophonic.

Remote Control

Your device may come with one of the two remote controls.

	Name	Function
	1.  Power	Turn you camera on or off, or enter standby mode.
	2.  Camera	View camera live view.
	 Playback	View images and videos from gallery.
	 PC 1/2	Switch to external VGA/HDMI source. Press the Camera button  to switch back to camera live view.
	 Capture	Take snapshots and store them on an SD card or a USB flash drive. Open the OSD menu > Settings > Capture Type to switch between Single capture and Continuous capture. <ul style="list-style-type: none"> • Single Capture: Press once to take a snapshot. • Continuous capture: Press to start and pause capturing. You may also set up capture interval.
	 Record	Start and stop audio and video recording. Store your recordings on an SD card or a USB Flash drive.
	 Freeze/Stop	Freeze the camera live view, or stop video playback.
	 Visor	N/A
	 Spotlight	N/A
	 Split Screen	N/A
	 Rotate	Flip the camera view.
	 Timer	<ul style="list-style-type: none"> • Start, pause or stop the timer. • Set the timer interval in OSD menu.
	 Mode	Switch among Normal, High frame, High quality, Microscope, Infinity, and Marco mode.
	3.  /  Menu	Open and close the OSD menu.
	4.    	<ul style="list-style-type: none"> • Pan and tilt control for digital zoom. • Navigate the menu. • Adjust volume.

		<ul style="list-style-type: none"> Fast forward or rewind the video.
5.	ZOOM 1x	Reset zoom ratio to 1x.
6.	 /  Zoom	Zoom in or out.
7.	 Del	Delete the selected images or videos.
8.		<ul style="list-style-type: none"> Confirm a selection on the OSD menu. Play and pause the video.
9.	 Reset	Reset to factory default settings.
10.	 /  Auto Focus	Focus automatically.
11.	 /  Brightness	Adjust the brightness.
12.	 /  Lamp	Turn the lamp on or off.

Connection

Before making the connection, make sure the power of all devices are turned off. If you are not sure where to connect, simply follow the illustrated connections below and refer to the user manual of the device you are connecting to the AVerVision M90UHD.

Power Connection

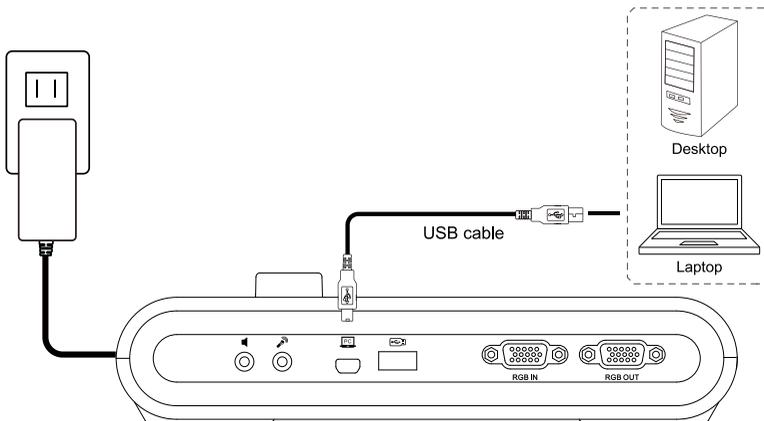

Plug in power adapter and press “Power” button on control panel to turn on the M90UHD.

* Wall outlet varies according to your regions

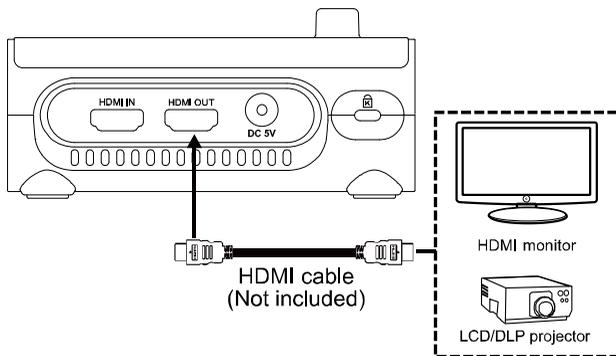

USB Connection

Connect M90UHD with the included USB cable to laptop/PC USB port, and use your device as a USB camera. You may select it as your camera when turning on software like Skype, Teams, Zoom and more.

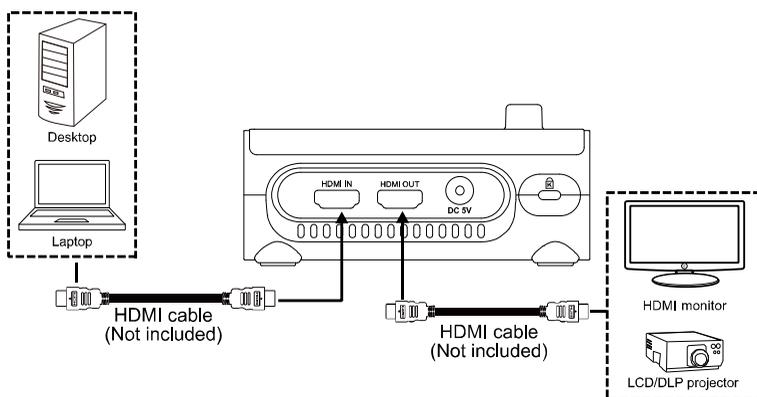

HDMI Out and In Connection

1. Connect M90UHD to HDMI display with HDMI output port.

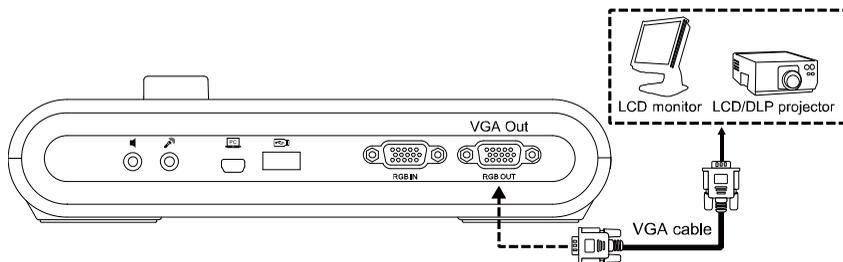

2. Connect M90UHD to laptop/PC with HDMI input port.

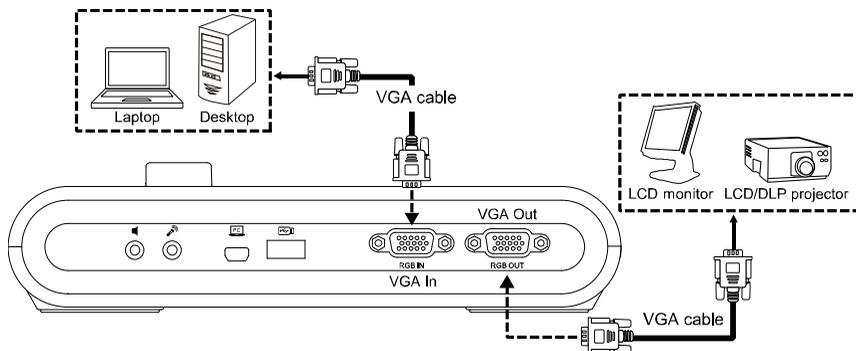

VGA Out and In Connection

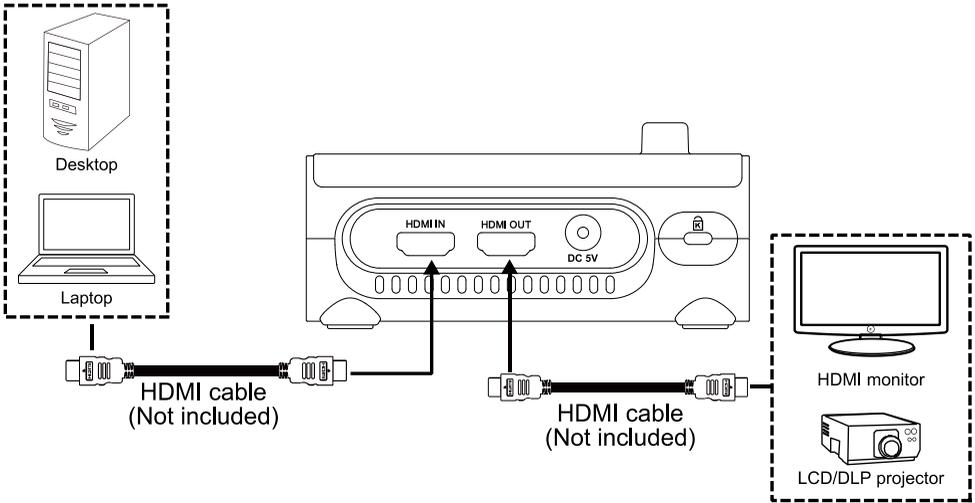

1. Connect M90UHD to VGA display with VGA output port.

2. Connect M90UHD to VGA display with VGA output port and VGA input source device with VGA input port.

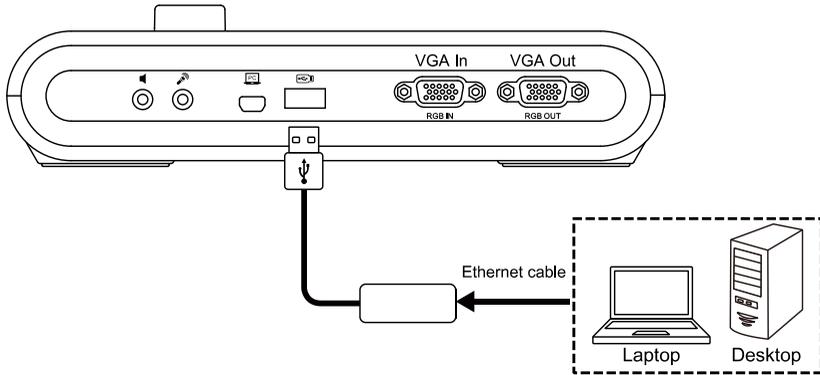

3. Press the Camera/PC button on the control panel or the remote control to display the computer screen.
4. To display the camera live view on your computer, press Fn+F5 on your keyboard to switch output source.

USB to Ethernet Adapter Connection

Connect your M90UHD to your laptop or desktop with a USB to Ethernet adapter (self-purchased accessory) for online control.

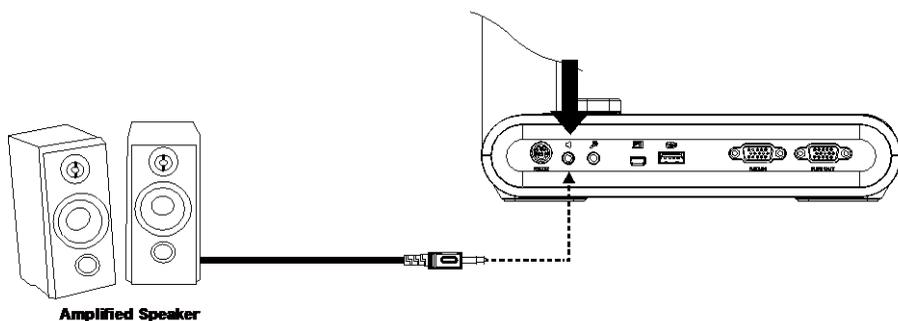

1. Connect the Ethernet cable from your computer to the USB to Ethernet adapter, then insert the adapter to your M90UHD.
2. Press MENU button on the control panel to call out the OSD menu.
3. Go to **System > Information** to check your Mac ID and IP Info when successfully connected to the Internet.
4. You may control your device by:
 - Entering IP control commands on a third-party Pocket Sender application;
 - Entering CGI Commands in your web browser.
5. Please refer to [Appendix](#) for IP control protocol and CGI command lists.

Amplified Speaker Connection

Plug a 3.5mm amplified speaker to Line Out () port. Only the audio from the video playback is supported.

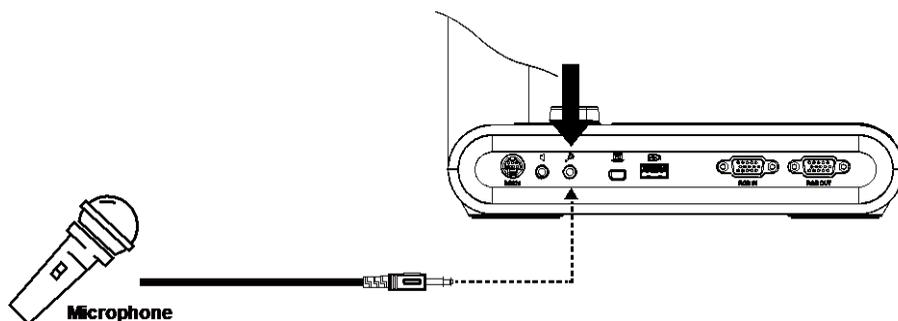

[Note]

We recommend connecting an amplified speaker to the Line out port. Take caution when using earphones. Adjust the volume down on the remote to prevent hearing damage due to loudness.

Connect a Microphone

Plug a 3.5mm microphone to MIC In () port.

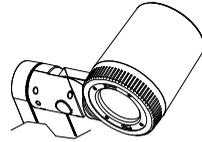

Microscope Connection

Connect the AVerVision M90UHD to a microscope enables you to examine microscopic objects on a big screen.

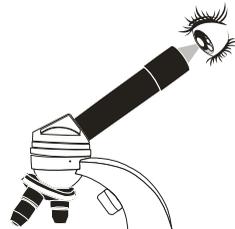

1. Change the image display mode to Microscope. Select **IMAGE** tab > select **Preview Mode** > select **Microscope** and press .

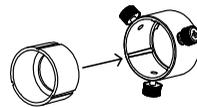

2. Aim the camera head at the farthest point and press **AUTO FOCUS**.

3. Adjust the focus of the microscope.

4. Select the appropriate rubber coupler size for the microscope eyepiece and insert it in the microscope adapter.

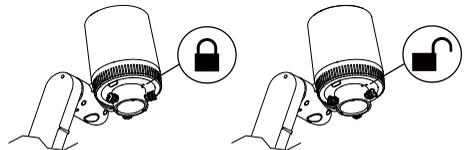

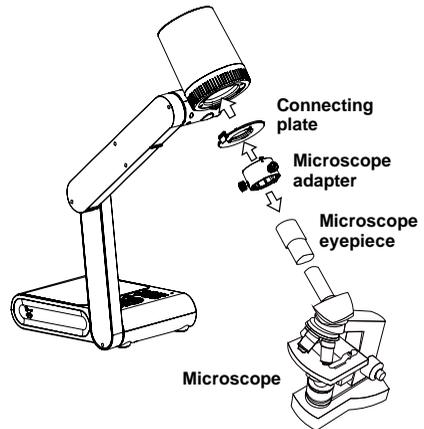

5. Remove the microscope eyepiece from the microscope and connect it to the microscope adapter with the rubber coupler inserted. Fasten the 3 bolts until the adapter secures the eyepiece.

- For the eyepiece, we suggest using 33mm eye relief or higher.
- Do the adjustment manually to get better image view.

6. Attach the microscope adapter to the AVerVision camera head with a connecting plate. Then connect it to the AVerVision and microscope.

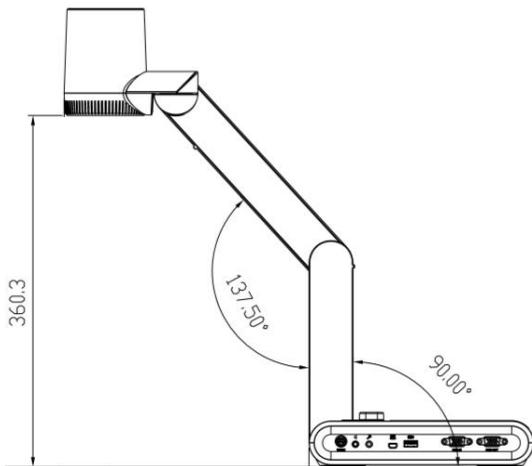

Make sure the arrows on the camera and microscope adapter are aligned and rotated to the left and locked.

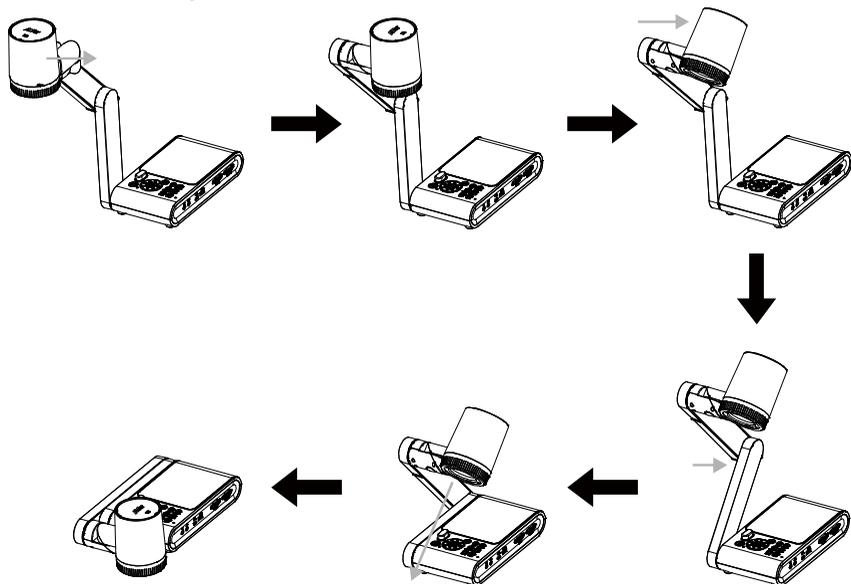

Get Started

This section provides useful tips on how to adjust the AVerVision M90UHD to meet your needs.

Dimension

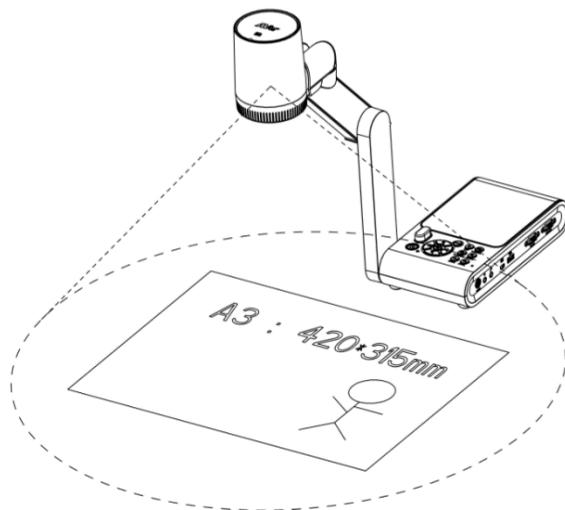

Please follow the below figure to store the document camera.

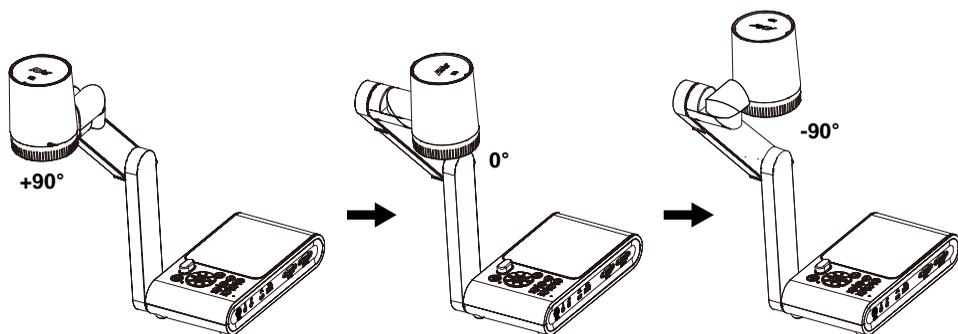

Shooting Area

The shooting area can be viewed an area of 420 x 315mm at High Definition preview mode.

When camera position is 360.3mm high, the shooting area will be A3 size.

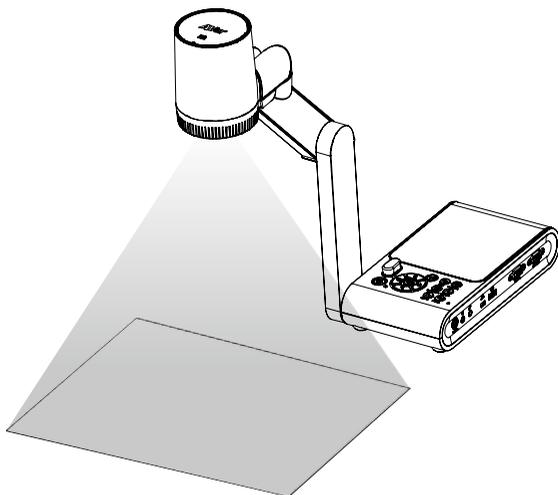

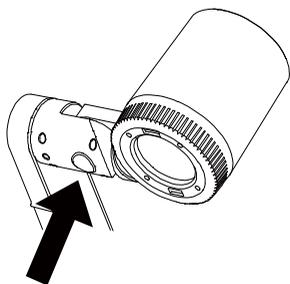

The Camera head can be rotated 90° as below figure shown.

To mirror the image, press **MENU** on the control panel > select **Mirror**, press **←**, and select **“On”**.

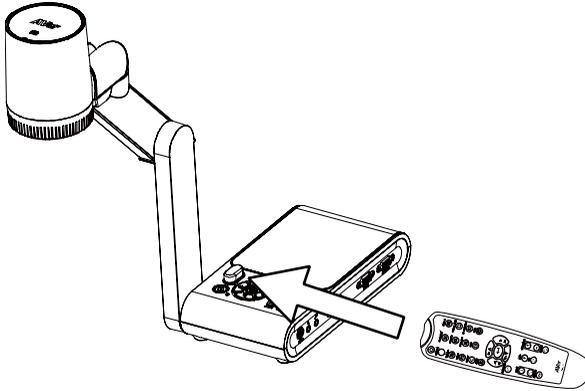

Overhead Light

Press LAMP button on the control panel or remote control to turn on and off light.

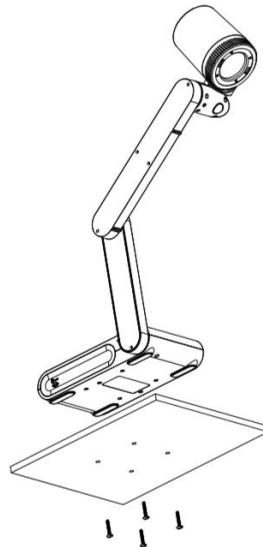

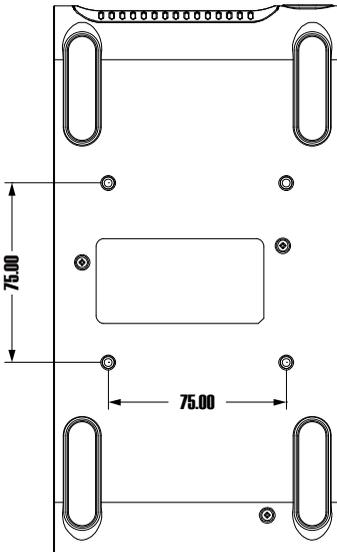

Infrared Sensor

Aim the remote control at the infrared sensor to operate the unit.

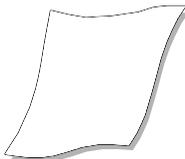

Mounting the M90UHD on a Flat Surface

Measure and mark the horizontal of 75 mm from the center line distance between the holes on the flat surface as describe in the illustration below. Use 2 or 4 pieces of M4.0 screws for 6 mm holes and secure the M90UHD on the flat surface.

Anti-glare Sheet

The anti-glare sheet is a special coated film that helps eliminate any glare that maybe encountered while displaying very shiny objects or glossy surfaces such as magazines and pictures. To use, simply place the anti-glare sheet on top of the shiny document to reduce reflected light.

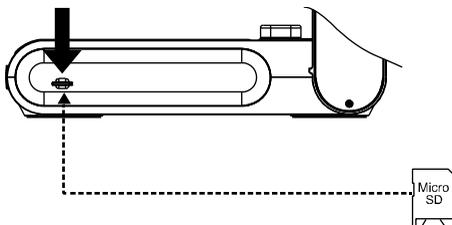

External Memory Storage

AVerVision M90UHD supports both Micro SD memory card and USB flash drive for more image capture and audio & video recordings. AVerVision M90UHD can detect when there is an external storage media and automatically switch to the last detected storage. If no external storage is connected, all captured still images will be saved in the built-in memory.

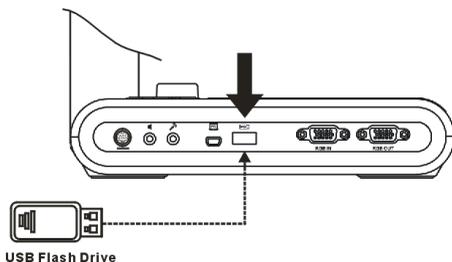

Insert a Micro SD Card

Insert the card with the contact facing down until it reaches the end. To remove the card, push to eject and pull the card out. The supported Micro SD card capacity is from 1GB to 32GB (FAT32).

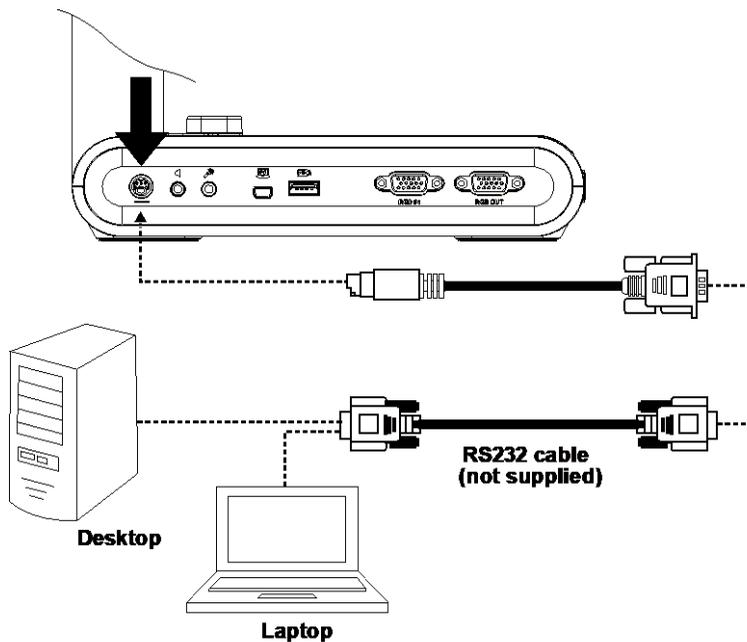

Insert a USB Flash Drive

Connect the USB flash drive in the USB slot. AVerVision M90UHD can support USB flash drive maximum 32GB. **Best to format the USB flash drive using AVerVision M90UHD for better video recording.**

RS232 Diagram Connection

AVerVision M90UHD can be controlled using a computer or any centralized control panel through RS232 connection.

For RS-232 Command list, please refer to [<Appendix>](#).

OSD MENU

There are 3 main options on the OSD menu: **IMAGE**, **SETTING** and **SYSTEM**.

IMAGE	Brightness

SYSTEM

Navigate the Menu and Submenu

1. Press **MENU** button on the remote or control panel.
2. Press **▶**, **◀**, **▲** and **▼** to choose a selection in the menu list.
3. Press **↶** to make a selection.
4. Use **▲** and **▼** to adjust the setting or make a selection.
5. Press **↶** to enter submenu.

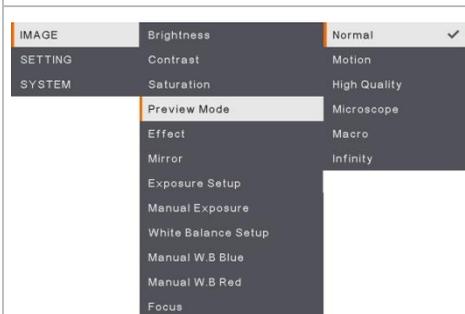

Image

Menu Screen	Function
	<p>Brightness</p> <p>Adjust brightness level manually between 0 and 255.</p>
	<p>Contrast</p> <p>Adjust the contrast level manually between 0 and 255 under bright and dark environments.</p>

Saturation

Adjust the saturation level manually between 0 and 255.

Preview Mode

Select from the various image display settings.

Normal - adjust the gradient of image.

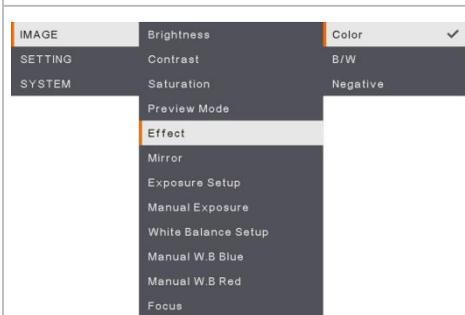

Motion – high refresh rate upon a motion image.

High Quality - high resolution with the best quality.

Microscope - automatically adjust optical zoom for microscopic viewing.

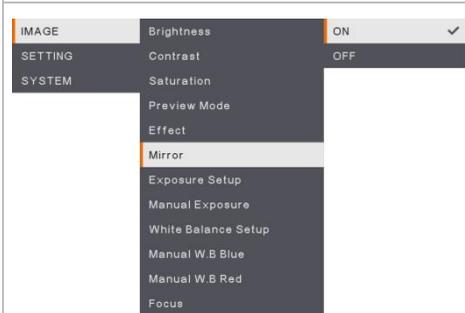

Macro – use for a closer image.

Infinity – use for a farther image.

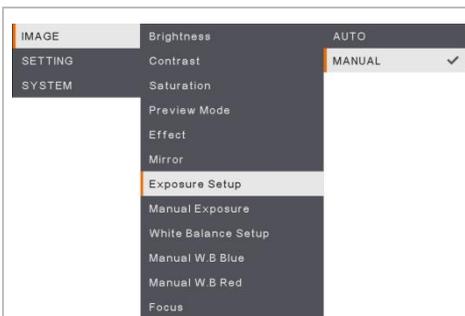

Effect

Convert the image into positive (true color), monochrome (black and white) or negative.

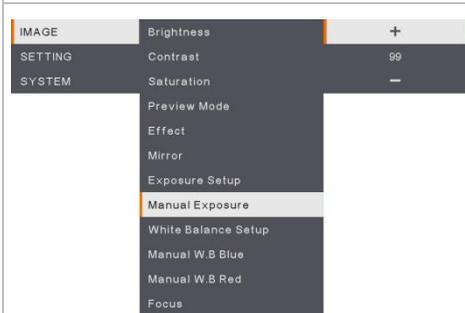

Mirror

Select to flip left and right of the image.

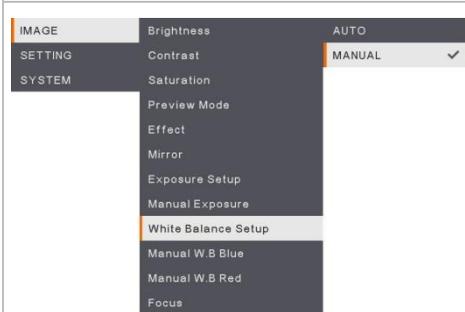

Exposure Setup

Select AUTO to automatically adjust the white balance and exposure setting and correct the color and exposure compensation. Select MANUAL to enable advanced settings for manual exposure and WB.

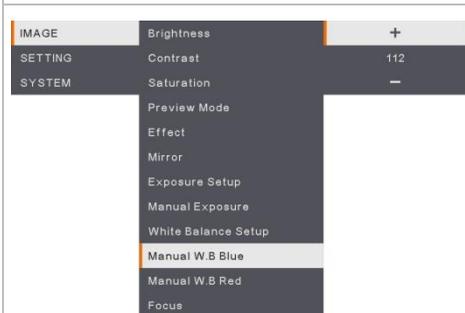

Manual Exposure

MANUAL - manually adjust the exposure level. The exposure can be adjusted between 0 and 99.

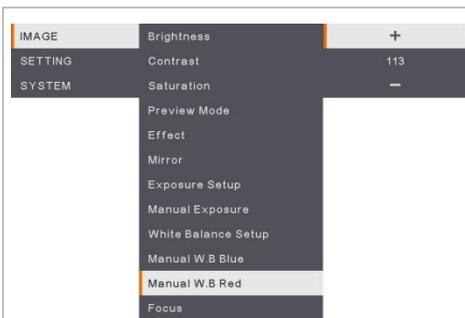

White Balance Setup

Select the White Balance setting for various light conditions or color temperature. **AUTO** - automatically adjust the white balance. **MANUAL** - manually adjust the color level. Select Manual to enable advanced WB setup.

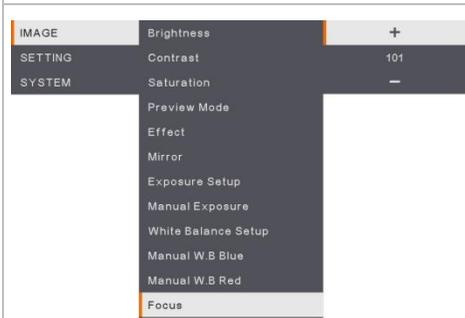

Manual WB Blue

Manually adjust the blue color level. The color level can be adjusted up to 255.

Manual WB Red

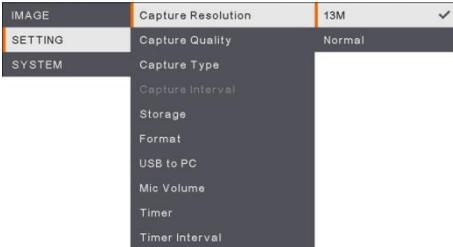

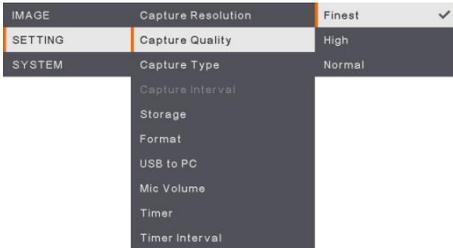

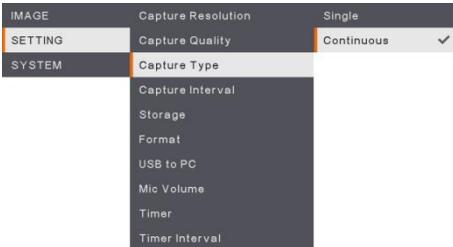

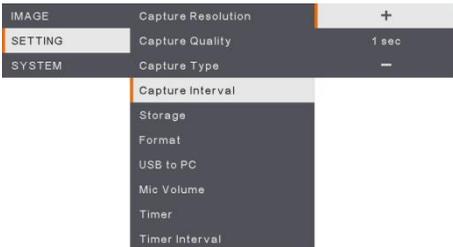

Manually adjust the red color level. The color level can be adjusted up to 255.

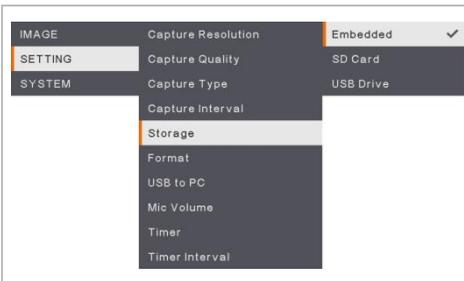

Focus

Manually fine-tune the image.

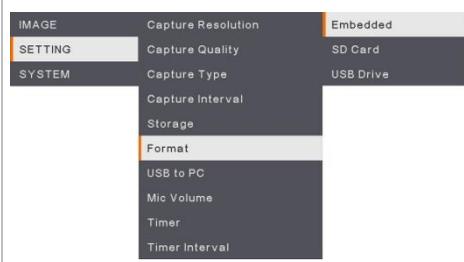

Setting

Menu Screen	Function
	<p>Capture Resolution</p> <p>Select the capture size. In 13M setting, the capture resolution size is 4208 x 3120.</p> <p>Select Normal, the capture size is based on the resolution settings.</p>
	<p>Capture Quality</p> <p>Select the capture compression setting.</p> <p>Select the Finest to get the best quality capture compression.</p>
	<p>Capture Type</p> <p>Select the capture type.</p> <p>Single - capture one image only.</p> <p>Continuous - capture successive images and press any key to stop continuous capture. Select Continuous to enable Capture Interval setting.</p>
	<p>Capture Interval</p> <p>Set the time interval for continuous capture. The length can be set up to 600 sec (10 min).</p>

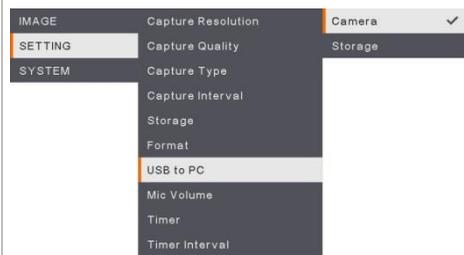

Storage

Change the storage location. Audio & video recording can only be saved in built-in memory, SD Card or USB Drive.

Format

Format to delete all the data in the selected memory.

USB to PC

Select status of the AVerVision M90UHD when it is connected to the computer via USB cable.

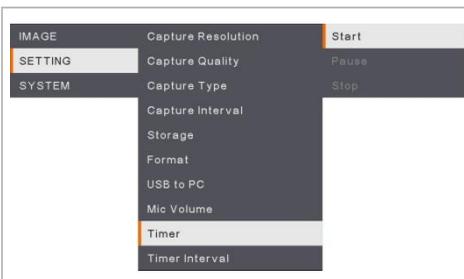

Camera - can be used as a computer webcam or with our bundled software to record video and capture still image.

Storage - transfer the captured pictures/videos from the memory to computer hard disk.

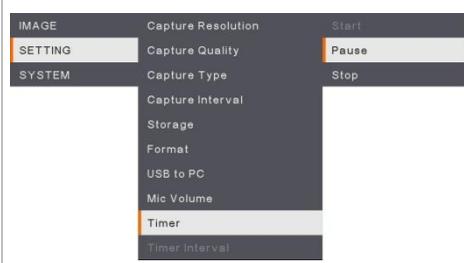

MIC Volume

Adjust volume input of recording or USB audio input.

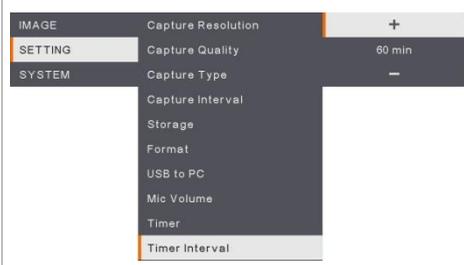

Start Timer

Start the timer. The timer automatically counts up after the countdown reaches zero to show the elapsed time.

Pause/Stop Timer

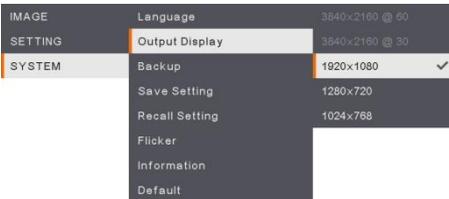

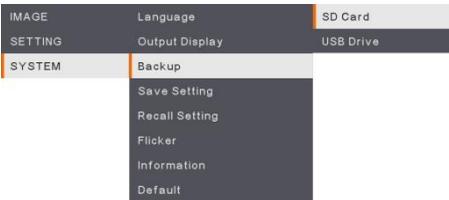

Press Menu button during timing to pause or stop timing.

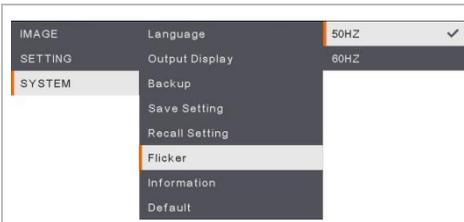

Timer Interval

Set the timer duration up to 2 hours.

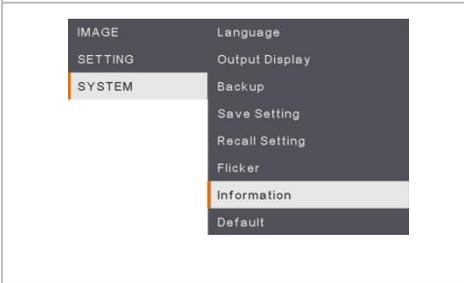

System

Menu Screen	Function
 <p>The screenshot shows the 'SYSTEM' menu with 'Language' selected. The language list includes: English (checked), 繁體中文, 日本語, Deutsch, Français, Español, 簡體中文, Italiano, Русский, Indonesia, Suomi, and Polski.</p>	<p>Language</p> <p>Change and select a different language. M90UHD supports up to 12 languages.</p>
 <p>The screenshot shows the 'SYSTEM' menu with 'Output Display' selected. The resolution list includes: 3840x2160 @ 60, 3840x2160 @ 30, 1920x1080 (checked), 1280x720, and 1024x768.</p>	<p>Output Display</p> <p>Set the resolution to display the image on screen. The output device resolution detected automatically and configured to the highest resolution.</p>
 <p>The screenshot shows the 'SYSTEM' menu with 'Backup' selected. The storage options are: SD Card and USB Drive.</p>	<p>Backup</p> <p>Copy the image from the built-in memory to SD card or USB flash drive.</p>
 <p>The screenshot shows the 'SYSTEM' menu with 'Save Setting' selected. The profile list includes: Profile 1, Profile 2, and Profile 3.</p>	<p>Save Setting</p> <p>Save current settings (Brightness, contrast, saturation, preview mode and etc.) in the selected profile number.</p>
 <p>The screenshot shows the 'SYSTEM' menu with 'Recall Setting' selected. The profile list includes: Profile 1, Profile 2, and Profile 3.</p>	<p>Recall Setting</p> <p>Restore the setting back to the selected profile number.</p>

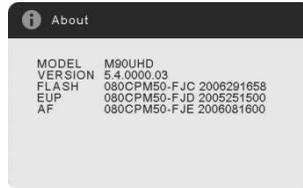

Flicker

Select between 50Hz or 60Hz. Some display devices cannot handle high refresh rates. The image will flicker a couple of times as the output is switched to another refresh rate.

Information

Display the product information.

Default

Restore all the settings into original factory default setting. All saving configurations will be deleted.

Playback

You can use the playback feature to configure the saved images or videos.

Menu Screen	Function
 <p>A screenshot of the Playback menu screen. The 'PLAYBACK' header is on the left. The 'Slide Show' option is selected and highlighted in orange. Below it are 'Interval', 'Storage', and 'Delete All' options. The 'Start' button is highlighted in grey.</p>	<p>Slide Show Start or Stop the Slide Show.</p>
 <p>A screenshot of the Playback menu screen. The 'PLAYBACK' header is on the left. The 'Interval' option is selected and highlighted in orange. Below it are 'Storage' and 'Delete All' options. The '1 sec' value is displayed next to the Interval option, with '+' and '-' buttons.</p>	<p>Interval Set the interval between playing images or videos.</p>
 <p>A screenshot of the Playback menu screen. The 'PLAYBACK' header is on the left. The 'Storage' option is selected and highlighted in orange. Below it is 'Delete All'.  <p>A screenshot of the Playback menu screen. The 'PLAYBACK' header is on the left. The 'Delete All' option is selected and highlighted in orange. Below it is 'Storage'. The 'NO' and 'YES' options are visible, with 'YES' having a checkmark.</p>	<p>Delete All Select this option to delete all saved images or videos.</p>

Transfer Captured Images/Videos to a computer

This enables you to transfer the captured image from the built-in memory, SD or USB drive to a computer.

Two ways to save images/videos:

- a. Built-in memory+SD card
- b. Built-in memory+USB drive

The instruction below **MUST** be read and followed **BEFORE** connecting the USB cable.

1. **MUST** set the USB to PC as STORAGE before connecting the USB cable.

2. When "**Mass Storage**" appears at the lower right corner of the presentation screen, you may now connect the USB cable.
3. Upon connecting the USB cable, the system automatically detects the new removable disk. You can now transfer the captured image(s) or videos from the **M90UHD built-in memory, SD card or USB drive** to the computer hard disk.

Appendix

IP Command Protocol

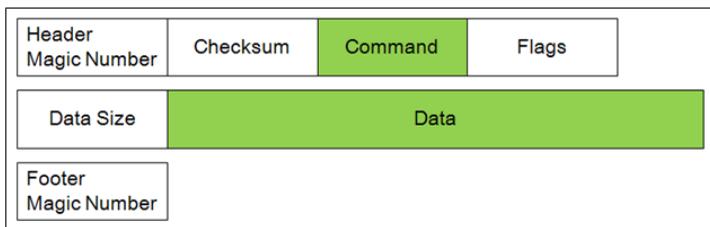

- Port

Internet protocol	IPv4
Transport protocol	TCP
Port address	9528

- Format

The data sent between device control and camera consists of multiple fields. The data in each field are placed in little-endian.

Header Magic Number	4-byte field with the value 0xABCD1234.
Checksum	4-byte field. The value is calculated from the data after the checksum field to the footer.
Command	4-byte field, indicating what to do
Flags	4-byte field, indicating if the command should be replied or not. This field could be either 0x00000000 or 0x00000001. 0x00000001 means it should be acknowledged. The default acknowledgement is just to echo the Command field and set Data Size to 0.
Data size	4-byte field, the length must be an integer multiple of 4
Footer Magic Number	4-byte field with the value 0x5678EF09.

* Example for Set Brightness (0x80000207) Value to 100 (0x64)

0xabcd1234 Header	0x8000026F Checksum	0x80000207 Command	0x00000000 Flags	0x00000004 Data Size	0x00000064 Data	0x5678ef09 Footer

Technical Specifications

- Image

Sensor	1/3.06" CMOS
Pixel Count	13 megapixels
Frame Rate	60 fps (max.)
White Balance	Auto/Manual
Exposure	Auto/Manual
Image mode	Normal, High Frame, High Quality, Microscope, Infinity, Marco
Effect	Color/B/W/Negative
RGB output	1280x720, 1024x768, 1080P
HDMI Output	4K, 1080p, 720p
Image Capture	200 Frames

- Optics

Focusing	Auto/Manual
Shooting Area	420 x 315mm
Zooming	Total Zoom 322x zoom (14x optical zoom + 23x digital zoom)

- Power

Power Source	DC 5V/3A, AC 100-240V, 50-60Hz
Consumption	10 Watts(lamp on); 9 Watts(lamp off)

- Lightning

Lamp Type	LED light
-----------	-----------

- Input / Output

HDMI Input	YES (HDMI, pass through)
HDMI Output	YES (HDMI, pass through)
VGA Input	YES (15-pins D-sub, pass through)
VGA Output	YES (15-pins D-sub, pass through)
USB-A Port	1 (Type A for USB flash drive)
USB-B Port	1 Mini-B Receptacle
MIC	Built-in
SD Card Slot	1 (micro SD card, 32GB)
Line Out	Phone Jack
Microphone	MIC in
DC 5V Input	Power Jack
Kensington Lock	YES
*RS 232(Optional)	Mini-DIN Jack (Use RS 232 Adapter Cable_optional)

- **Dimension**

Operating	481.3mm(L) x 159mm(W) x 469.9mm(H)
Folded	319.0mm(L) x 176mm(W) x 112mm(H)
Weight	2.2 +/-0.5Kg (about 5.732 lbs)

- **External Storage**

Micro SD Card	Max 32GB (FAT32)
USB Flash Drive	Max 32GB (FAT32)

**please note that this specification depends on certain order.*

Troubleshooting

This section provides many useful tips on how to solve common problems while using the AVerVision M90UHD.

There is no picture on the presentation screen.

1. Check all the connectors again as shown in this manual.
2. Verify the setting of the display output device.
3. If you are presenting from a notebook or computer through the display output device, check the cable connection from computer RGB (VGA) output to RGB input of AVerVision M90UHD and make sure AVerVision M90UHD is in PC Mode.
4. For HDMI display output, a delay occurs while waiting for both the display device and M90UHD to sync up. Wait for around 4 to 7 seconds until you see the camera image on the screen.

The picture on the presentation screen is distorted or the image is blurry.

1. Reset all changed settings, if any, to the original manufacturer default setting. Press **DEFAULT** on the remote or select Default in Basic tab OSD menu.
2. Use the Brightness and Contrast menu functions to reduce the distortion if applicable.
3. If you discover that the image is blurry or out of focus, press the Auto Focus button on the control panel or remote control.

There is no computer signal on presentation screen.

1. Check all the cable connections among the display device, AVerVision M90UHD and your PC.
2. Connect your PC to the AVerVision M90UHD first before you power on your computer.
3. For notebook, repeatedly press FN+F5 to toggles between display modes and display the computer image on the presentation screen. For different command, please refer to your laptop manual.

The presentation screen does not show the exact desktop image on my PC or Notebook after I toggle from Camera to PC mode.

1. Return to your PC or Notebook, place the mouse on the desktop and right click, choose "Properties", choose "Setting" tab, click on "2" monitor and check the box "Extend my Windows desktop onto this monitor".
2. Then go back one more time to your PC or Notebook and place the mouse on the desktop and right click again.
3. This time choose "Graphics Options", then "Output To", then "Intel® Dual Display Clone", and then choose "Monitor + Notebook".
4. After you follow these steps, you should be able to see the same desktop image on your PC or Notebook as well as on the presentation screen.

AVerVision M90UHD can't detect the inserted USB flash drive.

Make sure the USB flash drive is properly inserted and in correct format. Only FAT32 is supported.

Limited Warranty

For a period of time beginning on the date of purchase of the applicable product and extending as set forth in the **“Warranty Period of AVer Product Purchased”** section of the warranty card, AVer Information, Inc. (“AVer”) warrants that the applicable product (“Product”) substantially conforms to AVer’s documentation for the product and that its manufacture and components are free of defects in material and workmanship under normal use. “You” as used in this agreement means you individually or the business entity on whose behalf you use or install the product, as applicable. This limited warranty extends only to You as the original purchaser. Except for the foregoing, the Product is provided “AS IS.” In no event does AVer warrant that You will be able to operate the Product without problems or interruptions, or that the Product is suitable for your purposes. Your exclusive remedy and the entire liability of AVer under this paragraph shall be, at AVer’s option, the repair or replacement of the Product with the same or a comparable product. This warranty does not apply to (a) any Product on which the serial number has been defaced, modified, or removed, or (b) cartons, cases, batteries, cabinets, tapes, or accessories used with this product. This warranty does not apply to any Product that has suffered damage, deterioration or malfunction due to (a) accident, abuse, misuse, neglect, fire, water, lightning, or other acts of nature, commercial or industrial use, unauthorized product modification or failure to follow instructions included with the Product, (b) misapplication of service by someone other than the manufacturer’s representative, (c) any shipment damages (such claims must be made with the carrier), or (d) any other causes that do not relate to a Product defect. The Warranty Period of any repaired or replaced Product shall be the longer of (a) the original Warranty Period or (b) thirty (30) days from the date of delivery of the repaired or replaced product.

Limitations of Warranty

AVer makes no warranties to any third party. You are responsible for all claims, damages, settlements, expenses, and attorneys’ fees with respect to claims made against You as a result of Your use or misuse of the Product. This warranty applies only if the Product is installed, operated, maintained, and used in accordance with AVer specifications. Specifically, the warranties do not extend to any failure caused by (i) accident, unusual physical, electrical, or electromagnetic stress, neglect or misuse, (ii) fluctuations in electrical power beyond AVer specifications, (iii) use of the Product with any accessories or options not furnished by AVer or its authorized agents, or (iv) installation, alteration, or repair of the Product by anyone other than AVer or its authorized agents.

Disclaimer of Warranty

EXCEPT AS EXPRESSLY PROVIDED OTHERWISE HEREIN AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, AVER DISCLAIMS ALL OTHER WARRANTIES WITH RESPECT TO THE PRODUCT, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING WITHOUT LIMITATION, SATISFACTORY QUALITY, COURSE OF DEALING, TRADE USAGE OR PRACTICE OR THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF THIRD PARTY RIGHTS.

Limitation of Liability

IN NO EVENT SHALL AVER BE LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, PUNITIVE, OR CONSEQUENTIAL DAMAGES OF ANY NATURE INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, DATA, REVENUE, PRODUCTION, OR USE, BUSINESS INTERRUPTION, OR PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES ARISING OUT OF OR IN CONNECTION WITH THIS LIMITED WARRANTY, OR THE USE OR PERFORMANCE OF ANY PRODUCT, WHETHER BASED ON CONTRACT OR TORT, INCLUDING NEGLIGENCE, OR ANY OTHER LEGAL THEORY, EVEN IF AVER HAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. AVER’S TOTAL, AGGREGATE LIABILITY FOR DAMAGES OF ANY NATURE, REGARDLESS OF FORM OF ACTION, SHALL IN NO EVENT EXCEED THE AMOUNT PAID BY YOU TO AVER FOR THE SPECIFIC PRODUCT UPON WHICH LIABILITY IS BASED.

Governing Law and Your Rights

This warranty gives you specific legal rights; You may also have other rights granted under state law. These rights vary from state to state.

For warranty period, please refer to the warranty card.
