

In-Ceiling Speakers

SONOS

Architectural speakers for bold, built-in sound.

High-fidelity sound, low-key look

The Sonos collection of architectural speakers makes it easy to bring premium sound to every part of your home. Designed and tuned by Sonos and custom-built by Sonance, these speakers offer natural, room-filling sound with discreet installation.

Sonos Amp: Power meets performance

Power Sonos architectural speakers and maximize your system's potential with this WiFi-enabled amplifier. Sonos Amp offers unique benefits like optimized tunings, overdrive protection, and Trueplay™ technology, which tailors your speakers' sound for the unique acoustics of your home. A single Amp powers up to three pairs of Sonos passive speakers.

Create a custom whole-home system

Combine Sonos in-ceiling, in-wall, and surface mount speakers and smart home systems for the ultimate in whole-home sound with wireless control.

Sonos app: Curation and control

Pairing your In-Ceiling speakers with Sonos Amp also gives you access to the Sonos app, which brings all your content and controls together in one place. Play music and manage your Sonos system from any room; control everything with voice commands using Sonos Voice Control, Amazon Alexa, and Google Assistant.

8" In-Ceiling Speaker

- **Drivers:** 8 in LF, 1.2 in HF
