

Business & VC freestanding

062.2905 Business & VC freestanding electrical height adjustment, max 98" 180 kg

Besides our standard trolleys with and without height adjustment, used mostly in education, we have made available a range movable solutions for the use of (touch-)flat panels and VideoConference in the business market. These trolleys have a luxurious look and feel and offer the space to easily place your peripheral equipment out of sight in the enclosure. Available are several accessories to build-in such equipment and for a VideoConference camera or a soundbar are easy to mount adapters available.

De 062.2905 is a freestanding solution and offers an electrically adjustable highest position for monitors max. 98 inch with a maximum weight of 180 kg. The monitors centre can be freely electrically determined from 1192 - 1760 mm, plus 70mm manually, from the floor; making the trolley ideal for use in meeting rooms and (compact) boardrooms. In case a fixed position of the monitor is preferred, one could opt for one of the other trolleys. Of course the SmartMetals team is there to help with advise and making the proper choice for your installations.

Business & VC freestanding
