

Only White

The screen becomes a piece of furniture.

It is the frame screen created to meet the requirements of architects and interior designers who need to fit the product in sophisticated environments.

Only White is the solution that turns the screen into a piece of furniture.

The bearing structure is made of an aluminium profile which prevents any deformations guaranteeing perfect flatness of the projection fabric over the years.

The cloth is fixed in the rear part of the frame thanks to a series of rubber eyelets along the perimeter, which ensures the right tension. Every structural part of the screen is concealed, thus presenting a completely white object.

Only White is available in sizes and formats defined according to the customer's planning requirements. It is dedicated to residential installations up to 400 cm base while larger dimensions are more suitable for professional environments such as cinemas.

Screen characteristics

- smart design suitable for Interior Design installations
- quick mounting system
- anchor supports totally hidden
- possibility to realize the screens in the desired sizes and formats according to the planning specifications

Available fabrics

- Diamond
